✓ In agile development it's the\_\_loop that helps us create\_\_working software. \*2/2

- ☒ feedback and relevant
- ☐ functional and perfect
- ☐ imperative and quickly
- ☐ feedback and perfect

✓ Automated testing is really about verification than testing. \* 2/2

- ☒ yes
- ☐ no

✓ In a system with high automation testing, is there still place and use for manual testing. \*2/2

- ☒ certainly
- ☐ not at all
- ☐ depends on how many testers we have
- ☐ depends on how many programmers we have

✓ For successful development we need both the inner circle of\_\_\_ and the outer circle of\_\_\_. \*2/2

☒ expectations and relevance ✓

☐ customers and users

☐ experience and relevance

☐ expectations and users

✓ We should lower the programming cost and should not worry about maintenance cost. \*2/2

☐ yes

☒ no ✓
