✓ Write__tests to ensure the code completes within desired time limits. * 2/2

- ☐ powerful
- ☐ pending
- ☒ performance
- ☐ protracted

✓ Unit testing is more of an act of__than an act of__. * 2/2

- ☒ design and verification
- ☐ verification and design
- ☐ collaboration and creativity
- ☐ coverage and automation

✓ Writing tests on a piece of code makes it: * 2/2

- ☒ more modular
- ☐ more robust
- ☐ more cohesive
- ☐ less coupled

✓ A better design will possibly need fewer tests. * 2/2

- ☒ true
- ☐ false

✓ A__unit test ensures the code performs as expected while a__unit test checks for pre-conditions. *2/2

- ☐ automated and manual
- ☒ positive and negative
- ☐ automated and negative
- ☐ automated and positive
