

SD: Mediator Pattern

Total points 10/10

Email *

emmauyentrih@gmail.com

✓ Mediator encapsulates how a set of objects ____ . *

2/2

- ☐ interface
- ☒ interact
- ☐ inherit
- ☐ invert

✓ The mediator helps to turn a $n \times n$ relationship to a $1 \times n$ relationship. *

2/2

- ☒ yes
- ☐ no

✓ The mediator may be considered a sacrificial class that's introduced to reduce coupling. *2/2

- ☒ yes
- ☐ no

✓ While the mediator pattern tries to reduce ___, in turn, it may increase that in other areas. *2/2

☐ cohesion

☐ confusion

☒ coupling

☐ classes

✓ In the mediator pattern, the business logic related to interactions, that may otherwise be spread out, is centralized into the ___. *2/2

☐ base class

☐ derived class

☒ mediator

☐ observer
