✓ Using DIP means we have to rely on public interfaces and resulting poor performance. *2/2

☐ yes

☒ no

✓ The concepts that get used in DIP are: * 2/2

☒ interfaces

☒ inheritance

☒ association

☒ polymorphism

✓ The words that relate to DIP and the solution it offers are: * 2/2

☒ extensibility

☒ inheritance

☒ interfaces

☐ encapsulation

✓ DIP is used in the implementation of iterators. *

2/2

☒ yes

☐ no

✓ DIP is useful for making the code: *

2/2

☒ have loose coupling

☒ extensible

☒ testable

☐ robust
