---

✓ Manual testing is a form of regression testing. *                  2/2

- ⦿ yes                                                              ✓
- ○ no

---

✓ Automated tests complete a___loop, they tell us what worked continues   *2/2
to work as the code evolves

- ○ functional
- ⦿ feedback                                                         ✓
- ○ frequency
- ○ friction

---

✓ It often takes more time to: *                                    2/2

- ⦿ find the source of a problem                                    ✓
- ○ fix the error once it is located

---

✓ 100% code coverage means the code is well tested. *               2/2

- ○ yes
- ⦿ no                                                              ✓

---

✓ The cost of finding and fixing errors increases with time. *      2/2

- ⦿ true                                                            ✓
- ○ false
